Supporting Local Businesses

Bridgnorth Print Services have enjoyed the wonderful British Summer and have taken a picture overlooking the Severn which is shown on the front cover. If only..... We have suffered from rain, a bit more rain than it didn't rain but it looked like we were going to get parking meters. If it wasn't the weather keeping customers away it was crazy hair brained ideas like this!

Another new face that has joined us is Kirsty Richardson on a part-time basis. Young Kirsty comes fresh from school with some impressive design qualifications and will be helping us out as our business grows.

We now stock a full range of printer cartridges at absolutely bargain prices. Just look at our HP prices; check them out against Staples to see how much more money you can spend by travelling to Telford and buying them there. We guarantee that

despite being a small local business we will try and beat Staples on Printer Cartridge prices. Help us in our quest in supporting local businesses by shopping locally and saving locally,

Our in-house web design company continues to prosper with Paul Griffiths now taking on more and more local projects. Paul can provide from his independent web design company an on-site web design and enhanced graphics design capability. Paul Griffiths of Betelguise Web Design has a track record of supporting the web needs of small businesses, clubs and charities for more than three years. His current clients include shops, clubs, public houses, bands and businesses, as well as personal sites for clients.

If there are any other requirements you have please do not hesitate to contact us.

2011 Queen's Award For Enterprise

The deadline for entries is 29 October 2010. The three award categories of International Trade, Innovation and Sustainable Development are open to businesses employing at least two full time employees or part-time equivalents that are based in the UK and can demonstrate commercial success. Additionally, there is an individual award for Enterprise Promotion.

Fraud alert

The National Fraud Intelligence Bureau is warning that small businesses such as driving schools and bakeries, sports clubs are being targeted by individuals requesting payment for advertising in a police crime prevention yearbook. The suspect will say that agreement for the entry was gained over the phone and that payment is now due, and in some cases will then send an invoice. Contact the police if you have any information or think you have been a victim.

Micro firms should be exempt from pension reform ticking time bomb

The FSB is calling for all micro businesses to be exempt from automatically enrolling their staff into a pension scheme to remove the regulatory and financial burden on these businesses. Responding to the consultation, 'Government review of automatic enrolment', the FSB warns that the cost and time spent on administrative work will damage micro firms – those with 10 employees or less – and that the pension schemes set up by Government do not meet the needs of micro firms. The proposed changes are also very complicated for small businesses to put in place, and the FSB is concerned that small firms do not have the expertise they need to choose a pension scheme for their staff – FSB research shows that seven in 10 business owners do not feel confident in choosing a pension scheme for their staff.

For small and medium sized businesses, the FSB is instead calling for a default scheme to be set up in which everyone who is not currently saving should be enrolled. The FSB is also extremely worried

that the majority of small businesses and their employees are unaware that the country's pension scheme will change in only two years time. The pensions industry has yet to come up with an efficient system to cater for micro firms.

What in The World ? The World Wide Web

e-commerce for a larger shop window

The UK National Statistics tell us that in 2009 70% of households in the UK had internet access, with 63% of these having Broadband, and 64% of internet users purchased goods online in 2009.

Thus it is no longer the larger and national companies using this road to market, any company providing a product for sale is taking the risk of reducing their

turnover by not offering this option to their existing and prospective new clients.

Previously small businesses and shops saw the high outlay associated with e-commerce as not cost efficient for their operation. This is not the case.

From a simple cart to a full blown e-commerce solution Betelguise Web Design can create you an e-commerce web site that can affordably open this road to market and give your business a new shop window to a even larger customer base.

If you already have a successful web site and want to add e-commerce to it we are also happy to offer you this facility. Simply put, why reinvent the wheel let's just make it a better one. Call us today to discuss how e-commerce can improve your sales on **01746 761974**.

e-commerce Packages

From Just £ 425

A Full Shopping Cart Solution
